Education

Indian Institute of Information Technology, Nagpur

B.Tech in Electronics and Communication Engineering (IoT)

August 2023 - May 2027

CGPA: 7.85

Technologies and Skills

Programming Languages: JavaScript, TypeScript, C, C++, Python.

Frontend: React.js, Next.js, HTML5, CSS3.

Backend & AI: Node.js, Express.js, REST APIs, RAG, LangChain.

Databases: MongoDB, PostgreSQL, Redis.

Tools & Cloud: Git, GitHub, Docker, Kubernetes, AWS, Postman, Vercel, Render, VS Code.

Core CS: Data Structures & Algorithms, OOPS, Database Management Systems, Computer Networks.

Projects

HostelMart | [React.js](#), [Node.js](#), [Express.js](#), [MongoDB](#) [JWT](#), [Google OAuth](#), [ImageKit](#) [Live Demo](#) [github.com](#)

- Architected a centralized peer-to-peer campus marketplace with the MERN stack, onboarding **10+ active users** and reducing unstructured WhatsApp selling messages by **90%**.
- Engineered scalable RESTful APIs with **Node.js** and **Express.js**, leveraging optimized MongoDB data modeling, dynamic category filtering, and debounced search functionality.
- Implemented secure **JWT** and **Google OAuth** authentication pipelines along with **ImageKit** and **Multer**-based cloud image upload and processing.

QueryDesk | [React.js](#), [Node.js](#), [Express.js](#), [MongoDB](#), [LangChain](#), [Socket.io](#) [Live Demo](#) [github.com](#)

- Architected a production-grade full-stack AI platform with React (Vite) + Node.js/Express, integrating Google Gemini and Mistral AI via LangChain with Tavily API tool-binding for autonomous real-time web search.
- Built two AI-powered features: a Chatbot dashboard with persistent multi-session history and real-time LLM streaming via Socket.io; and a Seller Agent System with dynamic system prompts, hidden price constraints, and configurable negotiation strategies, accessible via unique shareable URLs.
- Secured with JWT auth, bcrypt hashing, Nodemailer Email verification, and strict CORS policies; deployed on Vercel, Render, and MongoDB Atlas with cascading deletion for data privacy.

FixMyRoad | [Flask](#), [MongoDB](#), [Computer Vision](#) [Live Demo](#) [GitHub](#)

- Architected an automated road damage assessment pipeline using **Computer Vision** with **92% detection accuracy** on geo-tagged images; developed a secure, role-based **Flask** dashboard that reduced manual verification time by **40%** through automated filtering.
- Formulated a priority-ranking algorithm that synthesizes community upvotes to automatically escalate critical infrastructure failures to authorities for faster resolution.

Achievements

- Competitive Programming:** CodeChef **2-Star** (Rating: 1568) in algorithmic contests
- LeetCode:** Solved **350+ problems** with a maximum rating of 1661; strong proficiency in DSA
- Winner:** Bioinformatics Machine Learning Challenge, IIIT Nagpur 2025 (300+ participants).

Experience

Web Development Co-Lead | Tantrafiesta, IIIT Nagpur | [Website](#)

- Led the development of the official fest website using Tailwind CSS, GSAP, Locomotive Scroll, and Three.js.
- Managed a developer team and delivered a high-impact website with **4,000+ global impressions**.

Senior Marketing Team Member | Abhiviyakti Cultural Fest, IIIT Nagpur

- Executed digital marketing strategies on Unstop, generating **10 Lakh+ impressions**
